Frontend UI/UX Design Handover

Anti-Gravity Development Team • Approved Light + Dark Themes

LOCKED SCOPE: Concept 3 = LIGHT MODE • Concept 2 = DARK MODE

EXCLUDED: Concept 1 is not part of this handover and must not be implemented or used as a reference.

1. Approved Theme Direction

The frontend redesign has exactly two approved visual themes. Concept 3 is the light-mode implementation and Concept 2 is the dark-mode implementation. There is no Concept 1 deliverable in this specification.

2. Reference Mapping

Reference	Approved use
REF-L01	Concept 3 — Light Mode
REF-D01	Concept 2 — Dark Mode
REF-M01	Shared workflow structure
REF-C01	Shared component language

3. Core Theme Tokens

Semantic	Concept 3 — Light	Concept 2 — Dark
Background	#FFFDF8	#06122B
Surface	#FFFFFF	#0B1E43
Raised surface	#F8F5EE	#102956
Primary text	#0B172A	#F8FAFC
Secondary text	#475569	#CBD5E1
Border	#E5E7EB	#24406D
Primary	#0B8F7A	#23B26D
Secondary	#0F5FBF	#2E80E8
Focus	#2E80E8	#69B8FF
Error	#C83E3E	#FF6B6B
Warning	#B7791F	#F4C95D

4. Typography & Layout

Use Inter where available. Display 32/40, H1 28/36, H2 22/30, H3 18/26, Body 14/20, Label 13/18, Caption 12/16. Spacing base 4 px; common values 8, 12, 16, 20, 24, 32, 40. Radii 8, 12, 16, 24 px. Breakpoints: mobile <640 px, tablet 640–1023 px, desktop ≥1024 px, large desktop ≥1440 px.

5. Component Rules

Buttons, inputs, cards, navigation, modals, sheets, toasts, skeletons and states use the same geometry across both themes and consume semantic tokens. Concept 3 supplies the warm, human-centered light styling; Concept 2 supplies the bold, immersive dark styling.

6. Interaction & Accessibility

Implement hover, pressed, focus, disabled, loading, empty, error and success states. Target WCAG 2.1 AA: normal text ≥4.5:1, large text ≥3:1, visible focus, touch targets ≥44×44 px, no colour-only status communication, screen-reader semantics, text scaling and reduced-motion support.

7. Implementation Contract

Use one shared page/component tree with theme tokens. Do not duplicate pages for light and dark. Preserve every existing route, workflow, validation, API call and business process. If a design decision is ambiguous, use the approved Concept 3/Concept 2 references and record clarification through the design-handover GitHub issue process.

8. Rollout

P0: tokens/global components → **P1:** home/discovery/service browsing → **P2:** booking/payment/tracking → **P3:** profile and states
→ **P4:** motion/responsive polish → **P5:** accessibility/regression release gate.

9. Version Control

Version 1.1 • 2026-08-26 • Scope clarified: Concept 1 explicitly excluded; Concept 3 Light and Concept 2 Dark remain the only approved themes.
